The **RAHN GL 650 INFIELD GROOMER** levels uneven playing fields, helping to prevent ridge build up while creating a safer, more consistent infield. The **RAHN GROOMER** also fills small holes and low spots, eliminating areas where water accumulates from rain and irrigation.

The triple row broom is perfect for finishing the playing surface and can be stored upright for easy transport. The **RAHN INFIELD GROOMER** also works as an efficient dethatching tool and prepares the outfield grass for overseeding.

The two-way leveling system provides both a lock and a float position to match conditions of the infield.

The **AERATOR GL650-8** helps to create more dense turf. The 2" spikes penetrate the soil beneath the turf, cutting the rhizomes and stolons while allowing water, air and fertilizer to reach the roots. The aerator also helps prepare turf for overseeding.

The heavy duty **SCARIFIER GL650-4** is the tool of choice for loosening hard, compacted infields.

The **SPRINGTINE GL650 4-10** is used in less compacted sandy soils. It helps to promote faster drying of wet infields and can also be used as an efficient dethatching tool.

## **SPECIFICATIONS**

### **RAHN LEVELING SYSTEM**

Double bar 72" wide; 3" x 3" x 1/4" structural steel.

### **HEAVY DUTY SCARIFIER**

60" wide bar; 2" x 2" x 1/4" structural steel; 3/8" x 1" x 3" replaceable hard-surfaced steel teeth.

### **SPRINGTINE SCARIFIER**

60" wide; 76, 4 1/2" replaceable springtines in two rows.

### **TRIPLE ROW BROOM ASSEMBLY**

73" wide; replaceable.

### **FINISH**

Electrostatically applied baked powder-coated finish.

### **WEIGHT**

225 lbs.

### **COMPATIBILITY**

All components of the Infield Groomer system are easily interchangeable.
