RESULTS ARE PRIOR TO MOWING!

✓ Vacu-Cutter™

✓ Vacu-Scarifier™

✓ Greens Spiker

✓ Star Slitter

GET MORE BANG FOR YOUR BUCK!

Easily complete 9 different cultural practices with only 1 machine. - Do more and SAVE MONEY!

VACU-CUTTER™

Promotes horizontal growth, enhances absorption of pesticides and nutrients, and gives you a finer, faster playing surface! Its tungsten-tipped blades stay sharp season after season allowing you to remove **20 times** more material than OEM verticutters - all with no extra clean-up! It's **VACUUM POWER** collects the material directly into the basket.

VACU-SCARIFIER™

For periodic linear aerification down to nearly 1/2" with 1.5" spacing. This unit is an ideal treatment to compliment regular use of the Vacu-Cutter™ inserts for reducing thatch and increasing firmness of greens.

VACU-GROOMER™

1/4" spacings to groom refined grasses, remove lateral growth, and promote vertical growth. to provide a faster, smoother, and finer textured putting surface. Additionally, this insert is an effective tool to remove seedheads.

DEEP SLICER

Creates 3/4" deep slits in the green to allow gas exchange and stimulate root growth. Provides maximum air/water/nutrient absorption. This is done without the removal of material.

GREENS SPIKER

Punctures the surface canopy on greens to allow air and water entry and reduces susceptibility to localized dry spot. Ideal for preparing your greens for overseeding with only 2 or 3 passes. Also, an effective tool for venting during high humidity.

STAR SLITTER

To aerate the surface of the green without disruption and prevent sealing caused by traffic. Can be used as often as required, at any time of year.

VACU-BRUSH™ (FIRM)

Use the firm brush to give your greens a light grooming or to remove dew, excess topdressing, and heavy debris including aerification cores & light debris. This brush is also capable of working topdressing into the canopy when you remove the grass basket from the triplex.

VACU-BRUSH™ (Soft)

Use this brush to give your greens a light grooming or to remove dew, excess topdressing and light debris including pine needles, leaves, & worm cast.

NV ROLLER

The NV Roller Insert will create smooth greens, and help you gain greenspeed. Rolling 3 times per week will allow you to raise the height of cut and mow less often, leaving your greens healthier.
