# GeoLink® Precision Spray System

MULTI PRO® SPRAYERS

## F E A T U R E S

- **RTK GNSS Spray System** – GeoLink is the first turf-based spray system, not agricultural-based like competitors. It utilizes cellular Real Time Kinematic (RTK) correction technology to provide sub-inch accuracy. This sophisticated communication system receives location data from multiple satellites and a correction source to provide precise location information. This gives the user the ability to map each spray area only once and spray it with precision year after year, saving time and resources.

- **Increased Efficiency** – Waste is virtually eliminated with GeoLink. The system automatically turns individual nozzles on and off based on the machine's exact location and the boundaries that have been set. Knowing exactly where you are and where you have already sprayed eliminates costly overlaps and missed strips. Consistent coverage and efficient application translates to serious, operation-changing chemical, foam marker and dye savings.

- **Easy-to-Use Touchscreen** – A large, weatherproof, touch screen shows the machine's location and allows the operator to create and choose spray jobs containing multiple spray zones. When the job is finished, the system provides accurate job reports that can be downloaded for analysis.

## Accurate to the inch. Savings by the mile.

GeoLink® is the industry's first turf-based precision spray system. Turf professionals will benefit from substantial chemical savings thanks to individual nozzle control and the available sub-inch accuracy. Reporting is simple with GeoLink; application rates, coverage maps, area and volume data are easily downloaded for thorough record keeping. The weatherproof touchscreen is rugged enough to withstand the most challenging conditions and makes application programming straightforward with just the touch of a button.

	TOPCON AGI-4 RECEIVER
<b>DIMENSIONS</b>	11.8 inch (330 mm) diameter and 5.1 inch (130 mm) height; 5.2 lbs. (2.4 kg)
<b>POSITIONING SYSTEM</b>	Standard WAAS, EGNOS & MSAS. Upgradeable to RTK accuracy with high grade IMU and GSM or CDMA modules.
<b>CONSTELLATIONS</b>	Multi-constellation (GPS + GLONASS = GNSS).
<b>POWER</b>	12 volt (min)
<b>COMPLIANCE</b>	ISO11783 compliant
<b>WEATHER RESISTANCE</b>	Achieved IP67 rating

	TOPCON X25 DISPLAY
<b>DISPLAY</b>	8.4" (213 mm) 800x600 px. Projected capacitive touchscreen, LED backlight with anti-reflective treatment.
<b>DIMENSIONS</b>	8.9"x 7.2" x 1.9" (226 x 183 x 48 mm).
<b>WEIGHT</b>	4.411 lbs. (2 kg) weight
<b>POWER</b>	9V - 36V input (voltage and polarity protected).
<b>OPERATING SYSTEM</b>	Linux with icon based GeoLink software. Intel chipset, Freescale i.mx6 dual-core, 900mHz processor, 1 GB DDR3, 4 GB + 2 GB flash.
<b>FEATURES</b>	Multiple inclusion zones, easy and standard modes, IP67 rated, configurable with multi-view capabilities, interactive keypad, on-demand mini views and expandable views, 28 languages, 3.5W rear-facing speaker, tree structure navigation, integrated light bar, multiple application control, ISO UT ready, remote capable.
<b>WEATHER RESISTANCE</b>	Achieved IP67 rating

## Key Benefits of GeoLink Precision Spray System:

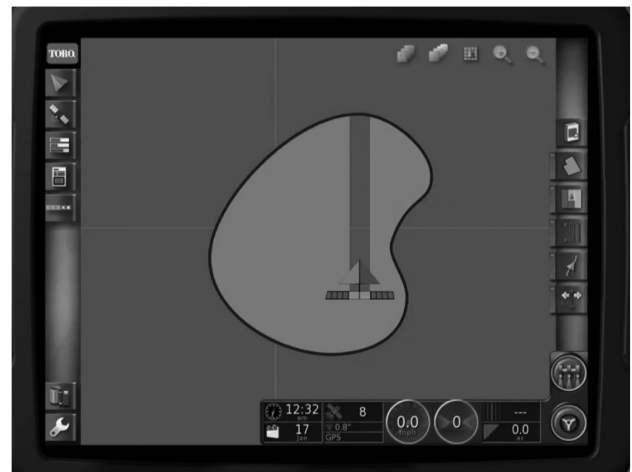

- Cellular-based
- Software for turf, not agriculture
- Repeatable sub-inch location accuracy
- Flexible, customizable and easy to use
- Intuitive icon-based menus
- Multiple inclusion zones – group like areas into a single job
- Easy and standard modes – password-protect application rates and other settings
- Improved consistency – less dependence on operator skill level

WAAS: The Wide Area Augmentation System (WAAS) was developed to augment the Global Positioning System (GPS), with the goal of improving its accuracy, integrity, and availability.

RTK: Real Time Kinematic (RTK) satellite correction is a technique used to enhance the precision of position data derived from satellite-based positioning systems, being usable in conjunction with all positioning platforms.

GeoLink's individual nozzle control saves time and money.

Highly intuitive, turf-based display with easy to use icons and precise mapping.
