

PRO SWEEP

THE CORE COLLECTOR

SPECIFICATIONS

POWER REQUIREMENT

8 GPM (30.3 l/min) @ 2000 PSI

HOPPER CAPACITY

25 CU. FT. (0.71 CU. M)

FORWARD OPERATING SPEED

0-4 MPH (0-6.4 KM/H), INFINITELY VARIABLE

DIMENSIONS

12'1"(L), 87"(W), 68"(H), 1,512 LBS.

PRO SWEEP FEATURES

ADJUSTABLE ROLLER HEIGHT - The roller height is adjustable to customize the specific turf applications.

FLOATING BRUSH HOUSING - The floating brush housing on the Pro Sweep rotates from side to side and front to back, allowing the sweeper to collect cores on uneven terrain.

WIRELESS RF REMOTE CONTROL - Only the Pro Sweep comes with a handheld wireless remote that lets you control sweeping and dumping operations with the touch of a button. It also lets you move the sweeper from tow to offset position, or stop power completely in the case of an emergency.

HIGH-LIFT DUMP - The high-lift dump provides the ability to dump all the cores easily into the bed of any dumpster or trailer.

PIVOTING SUB-FRAME - The pivoting sub-frame allows you to maintain positive tongue weight and gives you better traction even when the hopper is filling up.

HYDRAULIC OFFSET - The standard hydraulic offset allows you to move the sweeper from the hydraulic position to the collection position.

WINDROW BLADE - The windrow blade directs cores away from the tire and avoids crushing them.

HARPER
TURF EQUIPMENT

Aeration cores and other turf debris need to go somewhere. And that somewhere is the Harper Pro Sweep hopper. Faster and more effective than traditional methods of collecting cores and debris, the Pro Sweep quickly cleans greens, sports fields or any turf areas. If you're looking to bring efficiency into your turf sweeping process, and return to play sooner, invest in a [Harper Pro Sweep](#).
