

VERSA-VAC

BIG BLUE

SPECIFICATIONS

POWER REQUIREMENT

35 PTO W/ 540 PTO OUTPUT SHAFT

HOPPER CAPACITY

6.5 CU. YD (5 CU. M)

FAN IMPELLER

32" DIAMETER, 8 REINFORCED BLADES

DIMENSIONS

15'5"(L), 78"(W), 83"(H), 2,300 LBS.

VERSA-VAC FEATURES

RUBBER FINGER DECK

This finger deck works in conjunction with the Versa-Vac vacuum to pick up loose materials from golf courses and other large areas of turf.

COMBINATION DECK

Utilizing a flail motor followed by a finger rotor, the combo deck is designed to dethatch, renovate, and remove debris in a single pass.

20' HOSE OPTION

The Harper Versa-Vac is a powerful debris collection machine, and with the 20' hose attachment, it easily reaches tight or hard-to-access areas like ditches, flower beds, and around buildings. It's a time-saving solution for thorough, efficient clean up on large properties. Designed for versatility, the hose attachment allows operators to tackle areas that traditional sweepers can't reach. Whether you're clearing leaves, trash, or organic debris, the Versa Vac delivers consistent suction and performance.

HARPER
TURF EQUIPMENT

The Versa-Vac, one of the largest Harper turf sweepers, has an impressive 6.5 cu. yd (5 cu.m) capacity. Factor in the leaf-shredding action of the impeller fan and you'll hardly ever have to stop to unload. The cargo door and dump operate hydraulically with controls that sit directly behind the tractor seat for easy access. The hydraulics, sweeping decks and impeller fan are all powered by a 540 PTO drive with enough muscle to sweep up any debris.
